**To:** Keigwin, Richard [Keigwin.Richard@epa.gov]  
**Subject:** A brief, informal summary of selected SLNs that you may be interested in.... + an article from Science on pesticide regulation  
**Attachments:** Science\_Pesticide Decision Making\_Perspective Article 01June2018.pdf

Hi Rick –

I won't usually e-mail you directly, so I hope you won't mind this brief departure from that protocol. I thought I'd send you two things that are probably of interest to you.

One is a summary of some 24(c)s that OPP has received while I've been on this detail. A more complete description, in the form of an Excel file, is currently being reviewed by Dan Rosenblatt and should be sent to you via Mike Goodi. However, since you might get inquiries unexpectedly, I thought it couldn't hurt to send you some of the details informally. As follows:

Active Ingredient	State	SLN	Site/Target Pest
Chlorpyrifos	Georgia	GA180001	Sweetpotato/wireworms and flea beetles
Chlorpyrifos	Texas	TX180004	Sweetpotato/wireworms and flea beetles
Ethoprop	Delaware	DE180001	Lima and snap beans/nematodes
Malathion	Michigan	MI130005	Caneberries (raspberries, blackberries, etc)/spotted wing Drosophila

Malathion	New York	NY180006	All commercial and ornamental plantings of crops/European cherry fruit fly
Malathion	Washington	WA130010	Blueberries/spotted wing Drosophila
Tetrachlorvinphos + dichlorvos (co-formulated as "Ravap")	Texas	TX180002	Livestock and poultry premises/cattle fever tick
Oxamyl	New York	NY180003	Stem/bulb Onions/ Thrips

## Deliberative Process / Ex. 5

The second thing I'm sending is the attached PDF of an interesting article on pesticide regulation that was just published in Science magazine. It's just FYI (or FYE? E= entertainment!).

Thanks for considering this and hope all is well - Nikhil
